

Sickle Cell Foundation of Georgia, Inc.

"Living Well with Sickle Cell"

May 7th, 2025

To Whom it May Concern,

On behalf of the Sickle Cell Foundation of Georgia, it is my pleasure to commit to assisting with patient recruitment proposal *Assessing the knowledge of Gene Therapy as a Treatment Option in Sickle Cell Disease Population* being submitted to the Institutional Review Board (IRB) at University of Alabama, Birmingham by Hannah Eady, Graduate Genetic Counseling Student, University of Alabama Birmingham.

Sickle Cell Foundation of Georgia was contacted by Ms. Eady earlier this year with a request to recruit subjects via a flyer. Once Ms. Eady's study is approved by the UAB IRB, the foundation will recruit potential research subjects with SCD to contact her directly. Interested and eligible individuals will then have the opportunity to participate in the study by accessing the survey.

The Sickle Cell Foundation of Georgia is pleased to support this proposed research by aiding in participant recruitment.

Sincerely,

Tabatha McGee

Executive Director
